1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 56 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification as originally filed for the invention of claim 56. The specification as originally filed provides support for the fusion protein of claim 55 wherein the diphtheria toxoid is conjugated to the HCV polypeptide of claim 41. However, there is no disclosure in the specification as originally filed of a composition containing the fusion protein of claim 41 and diphtheria toxoid wherein said toxoid is not conjugated to the HCV fusion protein. There is no written description of the scope of the claimed invention in the specification as originally filed (aka the claimed invention constitute new matter).

3. Claims 41-44,52,55 are allowed.
